WHAT IS SECORA

We pride ourselves in being able to break down complex issues into manageable, solvable, and sustainable solutions.

SECORA

A global consulting company which has focal points in:

- Risk identification, mitigation, reduction, elimination
- Product and process quality investigations and improvements
- Short and long term strategy development and implementations
- Process streamlining and optimizations
- Operational effectiveness, efficiency, and agility
- Optimized decision making education and training

As well as developing own methodologies to accelerate operational distinction, we use:

- Agile/SCRUM/Kanban
- LEAN Production System
- Six Sigma Quality
- Quality by Design
- Emotional Intelligence
- Common sense

OUR APPROACH

QUALITY ADVANCEMENT

QUALITY ADVANCEMENT By reducing process variation businesses can dramatically improve quality and thus meet or supersede customer requirements. SECORA takes practical quality issues and translates them into mathematical models, develops mathematical solutions, converts the mathematical solution into practical improvement strategies, and finally implements process monitoring systems to enable sustained long term performance. SECORA uses the SECORA Continuous Improvement Methodology (SCIM) approach and traditional Six Sigma strategies to solve quality issues.

OPERATIONAL EFFECTIVENESS

By defining, selecting, and prioritizing main process output requirements, then identifying and maximizing the key critical components/drivers which make up the value chain throughout the process, operations become more effective. SECORA uses the SECORA Continuous Improvement Methodology (SCIM) approach and traditional Lean strategies to increase operational effectiveness.

PROCESS STREAMLINING

By identifying and reducing operational waste, such as unnecessary transport, large inventories (both final and in-process), excessive motion, pointless waiting, over production, over processing, frequent defects, and underutilized resources, processes are streamlined. SECORA uses the SECORA Continuous Improvement Methodology (SCIM) approach and traditional Lean Six Sigma strategies to streamline processes.

DEVELOPMENT & TRAINING

We ensure the most effective use of the organization's resources by clearly defining the purpose and inspiration of the organization, establishing realistic future goals and objectives, and finally communicating these objects and aims to the organizations constituents.

“

Do the right things
effectively rather
than the wrong
things efficiently.

Partnering with us will deliver measurable reduction of business risks, whilst improving quality and increasing effectiveness, efficiency, and agility.

We believe it is important to assist clients focus on doing the right things more effectively rather than doing wrong things more efficiently.

Clients choose us because there is no rule that says you can't work complex issues, whilst also having fun doing it.

Our motto "Adding the human touch" reminds us that behind all tasks are people who need to be supported by the processes.

WHY SECORA

SECORA is big enough to get any job done, and small enough to be uncomplicated.

OUR SERVICES

We pride ourselves in being able to break down complex issues into manageable, solvable, and sustainable solutions

WE ASSIST

We assist clients in bringing out all the good that is already within your company, rather than focusing on the bad.

WE ENABLE

We enable people who need to be supported by the processes they live in, rather than the other way around.

WE TEAM-UP

We team-up with clients and bleed with them until the issue is solved, rather than sit behind a desk and give sterile advice over the phone.

WE EMPOWER

We empower teams to focus on delivering actual work that supports your customers and business, rather than busy work that supports the machine.

WE STREAMLINE

We team-up with clients and bleed with them until the issue is solved, rather than sit behind a desk and give sterile advice over the phone.

WE TRANSFORM

We transform your organization into what your customers want it to be, rather than what we think it needs to be.

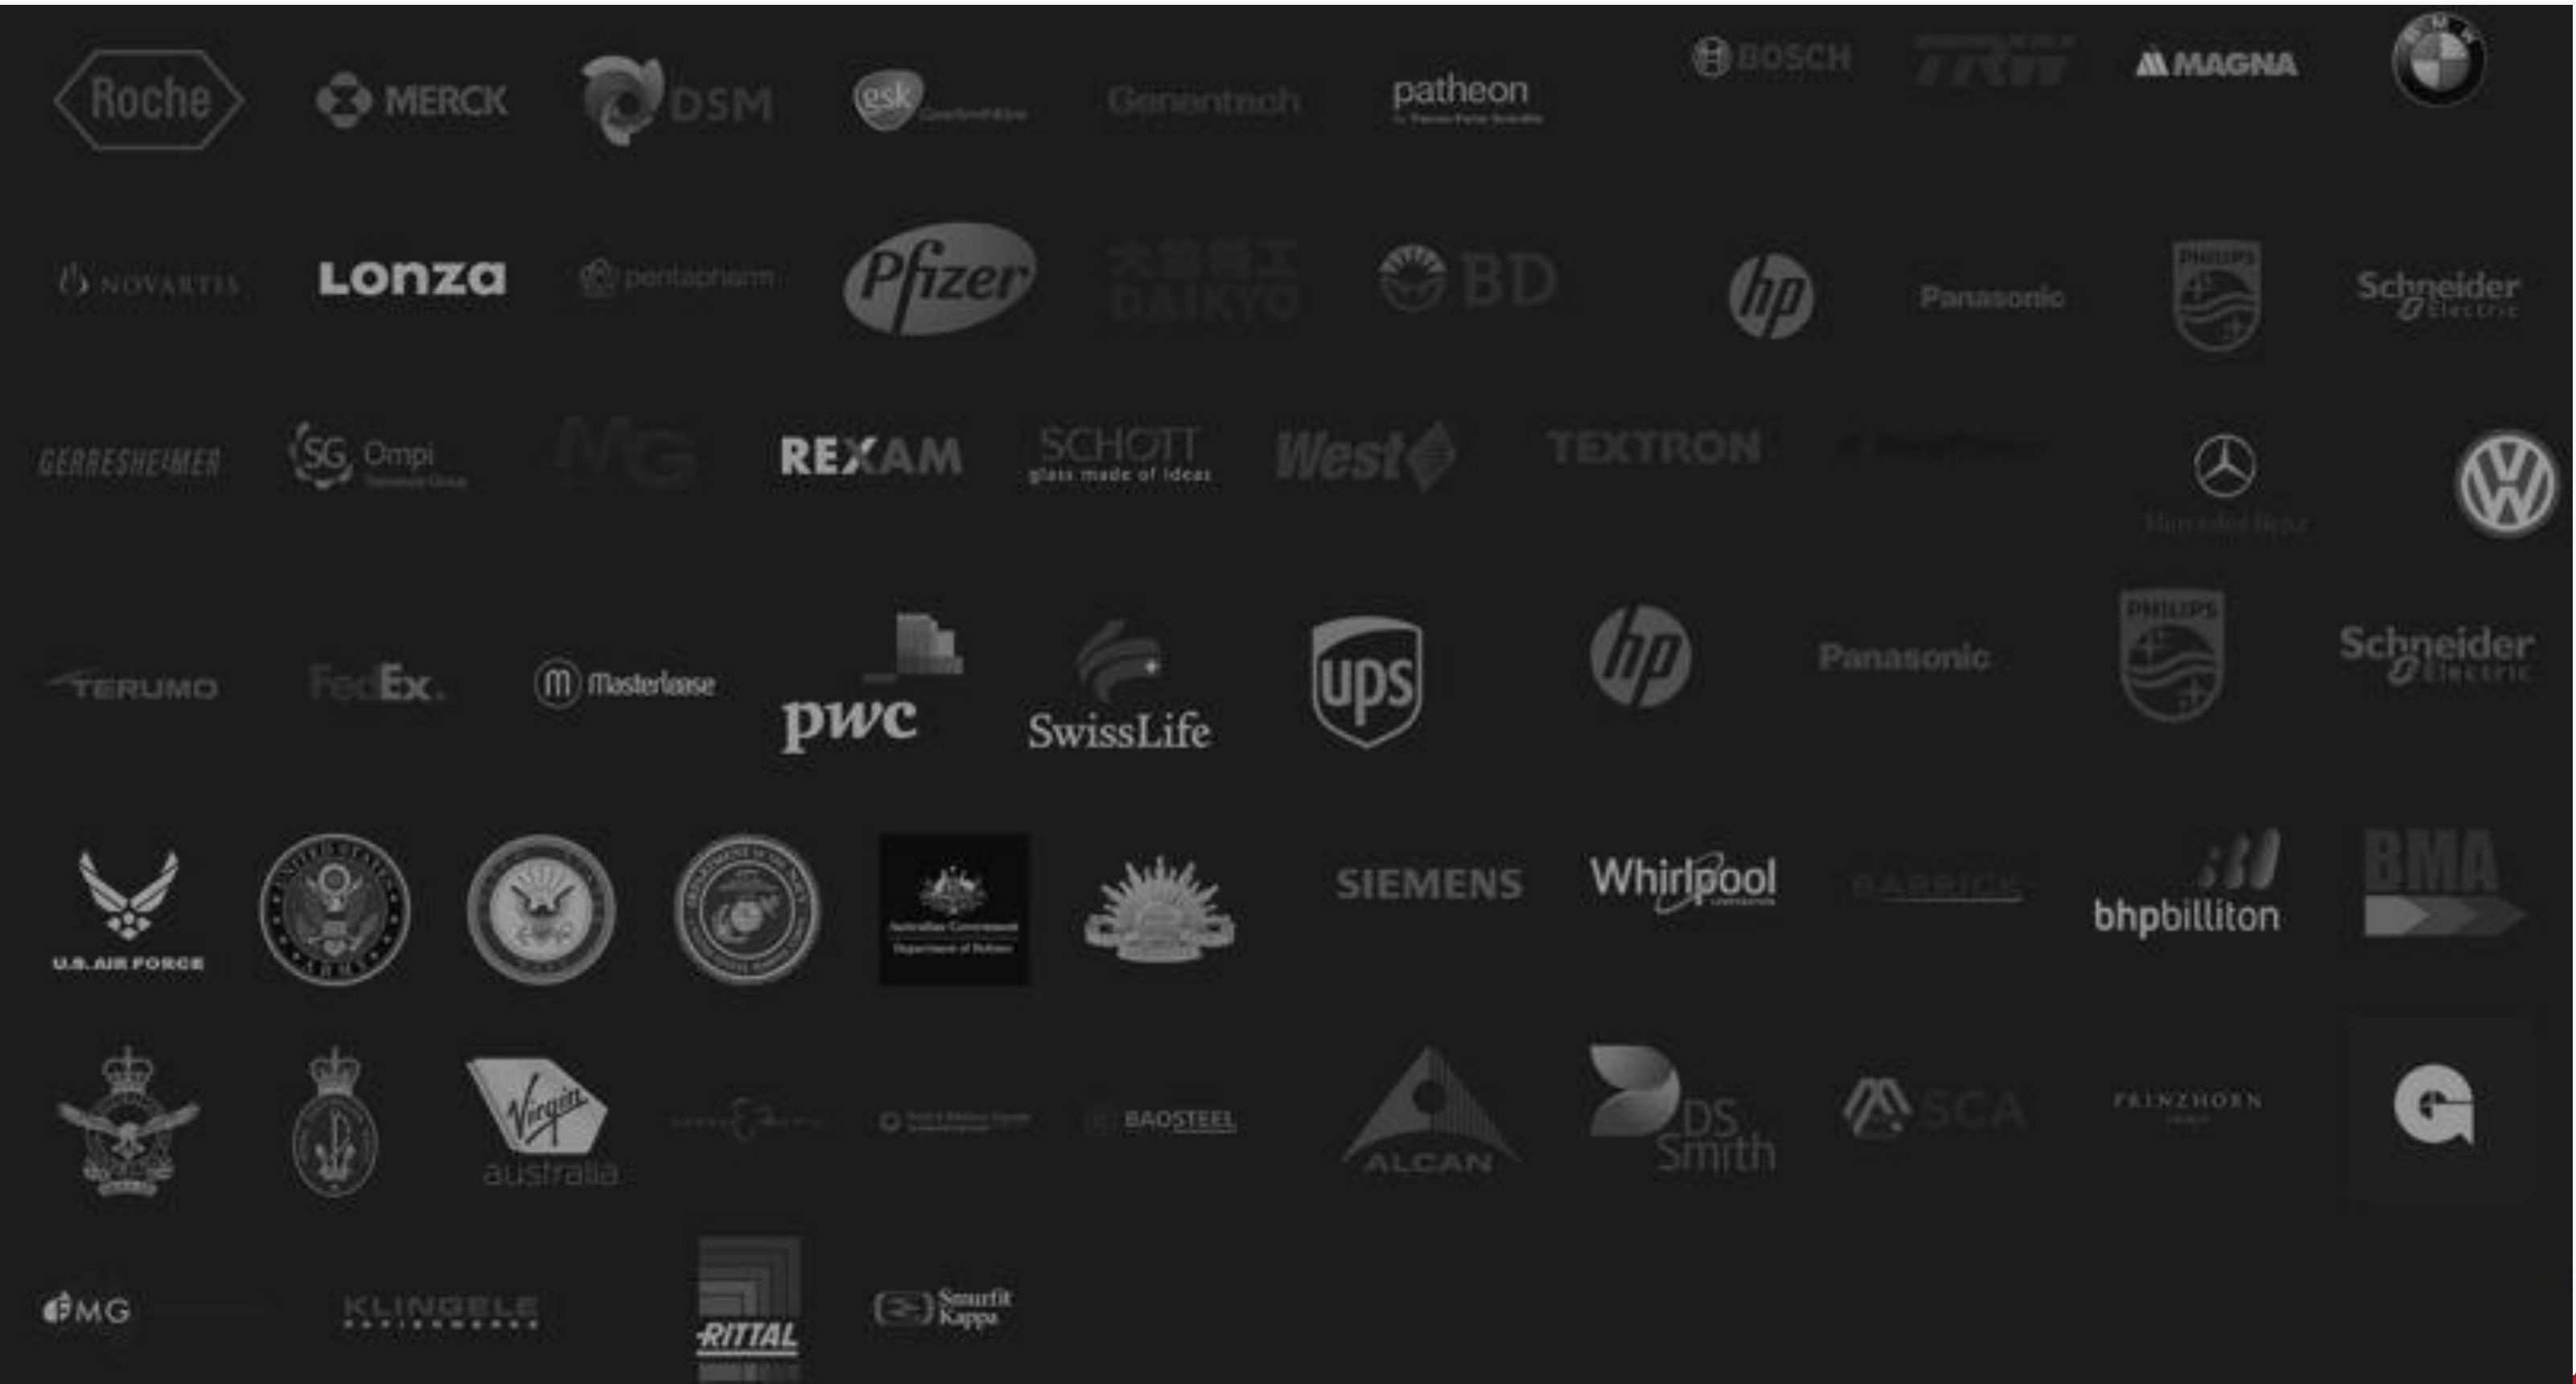

OUR CLIENTS

SECORA'S custom business solutions can be applied across a wide range of industries.

The principles of process relate equally well to quality, manufacturing, sales, IT, HR, logistics, administration, planning or development.

LOCATIONS
